**Skylight PVC Roof Windows**

# Sunlux SKYLIGHT PVC ROOF WINDOWS

Brand new product on the roof windows market made by one of the biggest companies in PVC windows industry. This roof windows have been based on the new profile with increased number of chambers. This excellent aesthetic and insulated PVC profile Avantgarde 6000 can be installed in various weather conditions even in high humidity. Our products are well isolated both acoustically and thermally.

## ADVANTAGES:

- Aesthetic and insulated profile which is resistant to the temperature changes and humidity
- Profile filled with insulating material
- Thermal permeability for the whole window  $U_w = 1,4 \text{ W/m}^2\text{K}$
- PVC profile has excellent age and dirt resisting properties
- Top third pivot system - the window opens outward giving plenty of headroom
- Modern swinging-rotary system provides easiness and functionality
- The window can be fitted on slopes between 15 and 75 degrees
- Three gaskets unique system provide excellent tightness
- Glass unit 4H-16-4T of  $U = 1,0 \text{ W/m}^2\text{K}$  (EN 674)
- Built in ventilation unit – trickle vent apart of ventilation via locking point
- They don't require any maintenance
- Exterior covers are made from polyester coated aluminium
- Handles and ventilation are in the same colour as PVC
- Tile and slate flashings

The patented system of fittings guarantees full stability of the sash in all its opening positions. External window metal sheet protects fittings against weather conditions and seals up the gap between frame and sash.

The opening positions are:

- **TILT** - allows to open the sash between 0-30 degrees
- **OPEN** - allows to open the sash up to 45 degrees
- **CLEANING** - allows the sash to be set to 120 degrees for easy cleaning

Sunlux flashings (tile, slate, combi) are available in the appropriate sizes to our roof windows.

# Sunlux ESCAPE WINDOW SKYLIGHT LOFT

Sunlux Loft is based on Sunlux Skylight Roof Window structure made from the same elements as our roof windows.

Comes in two sizes: 450/730 mm and 550/780 mm.

Sunlux Skylight Escape Window opening to the side has a safety lock enabling it to keep the window open at 90 degrees and making it possible to get safely to the roof in case of emergency.

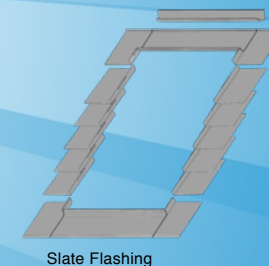

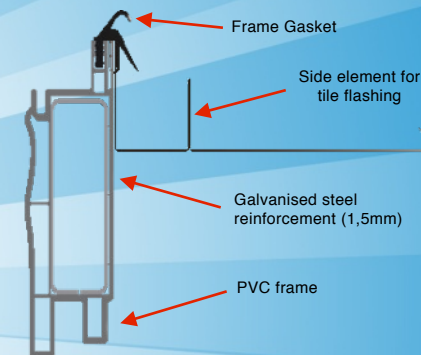

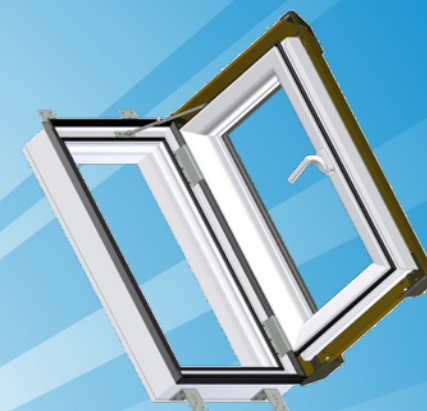

**Flashings** are the integral part of properly installed roof window. They secure and seal up against weather conditions in order to lead off water and protect against the wind.

Flashings are made of aluminium plate.

The main advantage of the flashing for Sunlux Skylight Roof Windows is an innovative connection to the frame that when installed and covered by a seal entirely eliminates a possibility of water leakage including the melting snow.

Sunlux Skylight PVC Roof Windows are available with three kinds of flashing:

- Tile Flashing
- Slate Flashing
- Combi Flashing

7mm Aluminium sheet coated with polyester varnish resistant to atmospheric elements, hardness H44, type 3105, colour RAL 7043

Glass unit 4H/16/4T Exterior glass toughened 4mm, aluminium frame 16mm internal glass low emission 4mm  $U_w = 1,0 \text{ W/m}^2\text{K}$
